## **HIGHLIGHTS OF SAN ANTONIO, TX NATIONAL COMPENSATION SURVEY NOVEMBER 2005**

Workers in the San Antonio metropolitan area averaged \$15.73 per hour during November 2005, according to a new survey released by the Bureau of Labor Statistics of the U.S. Department of Labor. Regional Commissioner Stanley W. Suchman reported that white-collar workers averaged \$19.61 per hour and accounted for 57 percent of the workers in the area. Blue-collar employees averaged \$11.55 per hour and represented 21 percent of the workforce, while the remaining 22 percent worked in service occupations and earned \$9.44 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments with 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal government. This NCS covered 205 firms representing 291,400 workers in the San Antonio metropolitan area, which is comprised of Bexar, Comal, Guadalupe, and Wilson Counties in Texas. Seventy-six percent of those represented worked in private industry.

In the San Antonio metropolitan area, average hourly wages were published for 31 detailed occupations. (See table 1.) Among white-collar workers, registered nurses averaged \$25.28 per hour; social workers, \$15.01; and bank tellers, \$11.56. Blue-collar occupations included truck drivers at \$11.88 per hour. In the service occupations, public service police and detectives averaged \$21.92 per hour and nursing aides, orderlies, and attendants, \$9.82.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the San Antonio area averaged \$16.54 per hour and part-timers earned \$8.16. Union workers in blue-collar jobs averaged \$19.14 per hour, while their nonunion counterparts made \$10.86. Private industry workers at establishments employing 50-99 workers averaged \$11.47 per hour and those in establishments with 500 or more employees earned \$16.02.

## National Compensation Survey, San Antonio, TX, November 2005 (continued)

The NCS is part of a statistical program that integrates three previously separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an occupation based on knowledge, skill, independent judgment, supervision received and other factors required on the job.

### **Survey Availability**

Complete survey results are contained in the San Antonio, TX National Compensation Survey November 2005 (Bulletin 3130-44). While supplies last, single copies of the bulletin are available from the Dallas Information Office by calling 214-767-6970. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at <http://www.bls.gov/ncs/ocs/compub.htm>. This release can also be obtained from the Bureau's fax-on-demand service in Dallas by dialing 214-767-9613 and requesting document 9540.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the Dallas Information Office at 214-767-6970 from 8:00 a.m. to 11:00 a.m. and 1:00 p.m. to 4:00 p.m. CT.

<sup>1</sup> Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

<sup>2</sup> All workers include full-time and part-time workers.

<sup>3</sup> A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

<sup>4</sup> The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means "not elsewhere classified." Overall occupational groups may include data for categories not shown separately.

<sup>1</sup> Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

<sup>2</sup> A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B for more information (in full publication).

<sup>3</sup> Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

<sup>4</sup> Union workers are those whose wages are determined through collective bargaining.

<sup>5</sup> Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

<sup>6</sup> The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A in the full publication.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

**Table 3. Establishment employment size: Mean hourly earnings<sup>1</sup> by occupational group<sup>2</sup>, private industry, National Compensation Survey, San Antonio, TX, November 2005**
